Student's Full Name: Hieu Dang

WEEKLY Log #4

From: 09/25 To: 10/01

Today's Date: October 2, 2023

Name of Agency: University of New Hampshire

Number of Hours Worked this week: 5 hours.

Cumulative Hours to Date: 37 hours

Individual's Weekly Log

I. Accomplished tasks this week:

1. Research about Django's database

- This week I have researched Django's database, because Django uses SQLite, which is different than Postgres from Azure. This action makes sure data incoming migration goes smoothly. Besides that, it helped me understand more about backend and Django.

2. Stop Azure's subscription.

- I got an advice from Professor Ken, to avoid charging, I have canceled Azure's subscription to avoid charging, which can be restored later if I need to use them. I did not know about this, I just turned off the services and thought it would not charge me, but it still did after I emailed and got helpful advice from professor.

II. Tasks in the process this week.

1. Reorganize my Django's project

- My previous Django's project was a mess and I need to reorganize and clean it. That makes sure the data would not conflict when we do the migration.

III. Tasks to be started next week.

1. Deploy and migrate my project.

 - From next week I will deploy and migrate database from my Django's project that I have been preparing on Azure.

2. Meet up with Professor.

- Next week I will meet up with Professor Ken for some advice about the Azure's system.
